Mastering Moisture and Edges: Advanced Strategies in Wound Healing with TIME^{1,2}

Smith+Nephew

Academy

Education + Innovation + Excellence

Sharon Scattergood

Matron for Tissue Viability, Mid Yorkshire NHS Trust

Deborah Chester-Bennett

Teaching and Learning Fellow (Adult Nursing), University of Salford

About the webinar:

Join us for a focused, one-hour session exploring the fundamentals of wound assessment and clinical decision-making. This webinar emphasizes the critical role of holistic assessment, with careful attention to tissue (T) and infection/inflammation (I) as key drivers of timely intervention. We'll also discuss when to escalate care using advanced therapies to support individualized healing.

Featuring an expert panel from the Society of Tissue Viability (SoTV), this session will empower clinicians to elevate their wound care practice with clarity and confidence

Learning objectives

By attending this webinar, attendees will enhance their knowledge and skills in the following areas:

- Understand the role of moisture balance in wound healing.
- Identify types and levels of exudate and appropriate dressing choices.
- Explore the use of sNPWT in managing exudate and promoting wound edge advancement.
- Apply the TIME^{1,2} framework interactively to real-world wound scenarios.

Who should attend:

Nurses, Tissue Viability Teams, Allied Health Professionals, Community and Acute settings.

Date: 22nd of October 2025

Time: 6:30pm-7:30pm

1.Schultz GS, Sibbald RG, Falanga V, et al. Wound bed preparation: a systematic approach to wound management. Wound Rep Reg (2003);11:1-28. 2.
